RECOMMENDATIONS.

October 26, 1867.

Having carefully examined John S. Hanna's Ready Reckoner, we most cheerfully recommend it to the public, as the best and most practical work now published. We do not hesitate to say that it should be in the hands of all who may be interested in the lumbering business.

HANNA'S

COMPLETE READY RECKONER

ANI

Log, Table and form Book:

(U. S. STANDARD.)

CONSISTING OF A

CORRECT SET OF TABLES

FOR THE

MEASUREMENT OF SQUARE TIMBER, BOARDS,
PLANK, SCANTLING, ROUND LOGS REDUCED TO INCH-BOARD MEASURE,
BOUND LOGS SCALED BY THE INCH, ROUND TIMBER BY THE TWO-THIRD RULE,
SQUARE INSCRIBED IN A CIRCLE, AND BY SOLID MEASURE INCLUDING SLAB,
AND ALSO THE SQUARE WHICH ANY ROUND LOG WILL MAKE WHEN
HEWN, BY THE AVERAGE GIFTH OR DIAMETER.

TO WHICH IS ADDED

A TABLE OF WAGES, BOARD, RENT OR OTHER EXPENSES PER WEEK OF SIX DAYS; ALSO, PER WEEK OF SEVEN DAYS, AND PER MONTH OF TWENTY-SIX DAYS; TOGETHER WITH TABLES SHOWING THE NUMBER OF DAYS FROM ANY DATE IN ONE MONTH TO THE SAME DATE IN ANY OTHER MONTH; A SHORT AND SIMPLE METHOD OF COMPUTING INTEREST; INTEREST TABLES AT SIX PER CENT, AND SEVEN PER CENT, SLO, VARIOUS BUSINESS FORMS.

Price, 60 Cents.

SENT BY MAIL OR EXPRESS, BY THE AUTHOR, FREE OF CHARGE, ON RECEIPT OF PRICE.

CONTENTS.

TABLE I.—Showing the Cubical Contents of Square or
Unequal Sided Timber, from 8 to 30 inches square,
and from 10 to 80 feet in length 8
TABLE II.—Showing the Contents of Boards, from 5 to
32 inches in width, and from 12 to 32 feet in length. 80
TABLE III.—Showing Contents of Plank, Board-Meas-
ure, from 11 to 4 inches in thickness, (varying in
thickness from \(\frac{1}{4}\) to \(\frac{1}{2}\) inch), from 5 to 30 inches in
width, and from 12 to 40 feet in length 81
TABLE IV Showing Contents of Scantling and Sawed
Lumber of all descriptions, Board-Measure, from 2
to 12 inches square, and from 12 to 40 feet in length. 81
TABLE VShowing Contents of Saw Logs reduced to
Inch-Board Measure, from accurately drawn dia-
grams for each sized log, from 8 to 50 inches in
diameter
Table VI.—Showing Contents, Board-Measure, of Saw
Logs 12 feet in length, from 8 to 50 inches in diam-
eter, and from 1 to 40 logs in number 110
Table VII.—Showing Contents, Board-Measure, of Saw
Logs 14 feet in length, from 8 to 50 inches in diam-
eter, and from 1 to 40 logs in number 111
TABLE VIII.—Showing Contents, Board-Measure, of
Saw Logs 16 feet in length, from 8 to 50 inches in
diameter, and from 1 to 80 logs in number 111
(CONTINUED.)

•
TABLE IX.—Showing Contents of Round Timber, Cubic PAGE.
Measure, by the Two-Third Rule, from 12 to 46
inches average diameter, and from 20 to 80 feet in
length
Table X.—Round Timber reduced to Cubic Measure;
showing contents of square inscribed in circle from
12 to 46 inches average diameter, and from 20 to
80 feet in length
TABLE XI.—Showing Full Contents of Round Timber,
Cubic Measure, including Slab, from 12 to 46 inches
average diameter, and from 20 to 80 feet in length. 156
Table XII.—Wages or other Expenses, per Week of
Six Days
TABLE XIII.—Wages, Board, Rent, or other Expenses,
per Week of Seven Days
Table XIV.—Wages or other Expenses, per Month of
Twenty-six Days
Table XV.—Showing the number of Days from any
Date in one Month, to the same Date in any other
Month
TABLE XVI.—Short and Simple Method of Computing
Interest, from 1 to 25 per cent
TABLE XVII.—Interest Table, at Six per Cent., from
One Day to One Year, and from One Dollar to One Thousand Dollars
TABLE XVIII.—Interest Table, at Seven per Cent.,
from One Day to One Year, and from One Dollar to One Thousand Dollars,
TABLE XIX.—Showing the Square any Round Log will
make, when hewn, by the average girth or diameter. 194
Table XX.—Various Business Forms

PREFACE.

THE Author, in presenting this, his *Third Edition* of the Ready Reckoner, Log Table, and Form Book, would call the attention of his former patrons and others to the following Tables:—

Square or Unequal Sided Timber, Cubic Measure; Board or Surface Measure; Plank Measure; Scantling or Sawed Lumber; Round Logs reduced to Inch-Board Measure; Contents, Board-Measure, of a given number of Saw Logs; Round Timber reduced to Cubic Measure by three different Rules; the Square any Round Log will make by the average girth or diameter; Wages, Board, Rent, or other Expenses, per Week of Six Days; also, per Week of Seven Days; Wages or other Expenses, per Month of Twenty-six Days; the Number of Days from any Date in one Month to the same Date in any other Month; Short and Simple Method of Computing Interest; Interest Tables, at Six per Cent.; also, at Seven per Cent., also, various Business Forms.

The calculations of the Tables of the Revised Edition have been carefully and accurately made, and the entire work is so simple, that no person for whose use it is intended, can fail to

understand it at a glance.

To persons not adepts in figures, these Tables will be found invaluable, and even to those who are rapid and accurate in calculation, but who, for want of time, are compelled to hurry over their work, they will furnish a test of the correctness of their calculations.

In offering the Revised Edition, the Author desires to express his acknowledgment to Lumbermen and others, who so liberally and extensively patronized his former edition, and begs to assure them that the present volume will be found in all respects

complete for the purpose for which it is designed.

The Author has had considerable practical experience in the measurement and inspection of Lumber. He has made the business a study for years, and feels confident that this work will commend itself to all parties interested in this great commodity of the United States and Canada.

J. S. HANNA.

TABLE I.

SQUARE TIMBER, CUBIC MEASURE.

EXPLANATION.

THE length of the stick will be found at the head of table; while the sizes run in columns down the page, with the amounts.

For Example:—Should you require the contents of a stick of timber 40 feet in length, 16 by 19 inches; turn to page 39, containing the 40 feet lengths, and follow down the left-hand column until you find 16 by 16 = 71 feet; then run across to the right until you come to 16 by 19, and you will see at a glance that it contains 84 cubic feet; and one of the same length, 12 by 14 inches, contains 46 feet; and in like manner you will find the contents of any sized stick that you may want from 8 to 30 inches square, and from 10 to 80 feet in length.

Should a stick of timber exceed in length the number of feet contained in any of the following tables, its contents will be found by taking twice what is shown for half its length; and for a shorter length than is given, take half of what is shown for twice its length. Thus, should you require the contents of a stick 100 feet in length, take twice what is shown for one 50 feet in length of the same size; and should you require the contents of a stick 8 feet in length, take half what is shown for one 16 feet in length of the same size, and you will get the desired amount. The above rules to be observed in all tables contained in this work.

The measurement is supposed to be made at the middle of the stick, and the fractions of an inch not counted. I have also omitted the fractions in the calculation, as an offset for defects not observable by the inspector.

See pages 9 to 79, inclusive, for Square Timber Table.

TABLE II.

BOARD MEASURE.

EXPLANATION.

THE following is a carefully and accurately prepared table for computing board measurement. The calculations are correct and reliable, and show at a glance the contents of any sized board from 5 to 32 inches in width, and from 12 to 32 feet in length.

The length of any board will be found in the left-hand column of the page, and the width, in inches, at the head of the table.

To find the number of feet which any board will give, take the length in the left-hand column of the page, and the width at the head of the table; trace the two lines until they meet, and you will have the amount sought for.

For Example:—A board 16 feet in length and 16 inches in width contains 21 feet, board measure; while one 32 feet in length and 20 inches in width contains 53 feet.

Should a board, plank, or scantling exceed in length the number of feet contained in any of the following tables, its contents will be found by taking twice what is shown for half its length; and for a shorter length than is given, take half of what is shown for twice its length.

In all cases, in the sawed lumber tables, the fractions of half a foot or less are omitted in the calculation, while those over half a foot are counted as a whole foot.

When measuring green-sawed lumber, the fractions of a foot in the measurement should not be taken into the account, or it will not hold out when seasoned.

See pages 82 and 83, inclusive, for Board Table.

TABLE III.

PLANK MEASURE.

EXPLANATION.

THE following table shows at a glance the number of feet, board measure, contained in any sized plank, from 5 to 30 inches in width, and from $1\frac{1}{4}$ to 4 inches in thickness, (varying in thickness from $\frac{1}{4}$ to $\frac{1}{2}$ inch,) and from 12 to 40 feet in length.

To find the number of feet which any plank will give, take the length in the left-hand column of the page, and the width and thickness at the head of the table; trace the two lines until they meet, and you will get the desired amount.

The same rules to be observed as given under head of Board Rule, Table II., page 80.

See pages 84 to 99, inclusive, for Plank Table.

TABLE IV.

SCANTLING MEASURE.

EXPLANATION.

To find the number of feet, board measure, any sized piece of sawed or hewed lumber contains, from 2 to 12 inches square, and from 12 to 40 feet in length, you will see at a glance by taking the length in the left-hand column of the page, and the desired size at the head of the table; trace the two lines until they meet, and you will have the amount sought for.

Observe the same rules as given under head of Board Rule, Table II., page 80.

See pages 100 to 104, inclusive, for Scantling Table.

ROUND LOGS ACCURATELY REDUCED TO INCH-BOARD MEASURE.

TABLE V. EXPLANATION.

This, perhaps, is the most important table to that large class of persons now engaged in the manufacture of saw-logs into lumber, to ascertain the quantity or number of feet in a saw-log of any given size, by the measurement of the log.

These tables have been computed from accurately-drawn diagrams for each and every sized log from 8 to 50 inches in diameter,

as the annexed diagram will show, with lines drawn crosswise. accurately sured one inch apart one way, and one and a quarter inch apart the other way, allowing a quarter of an inch to each board for saw - carf. Thus it will be seen tnat the contents of each and every log is accurately obtained, and can be relied on with safety to both buyer and seller

of logs for a correct measurement of their lumber.

The diameter is supposed to be taken at the small end of the log, inside of the bark, and the fractions of an inch not counted. For example:—Take a log 16 feet in length and 19 inches in diameter, and you will see on page 106 that it contains 240 feet, board measure. The length of the log will be always found in the first left-hand column, and the diameter in inches at the top of the page.

In addition to all this,—as will be seen in the preceding pages,—the opinions of extensive sawyers and lumber-dealers have been obtained, and their recommendations given, as the best and most

practical work now published.

Note.—To make a straight and sound scale the scaler must make beductions for ALL defects in logs.

TABLE VI.

CONTENTS OF SAW LOGS, SCALED BY THE INCH.

12 Feet in Length.

EXPLANATION.

To persons engaged in scaling saw logs, this table, as also the two following tables, will be found the most convenient and useful of any that has ever been published. It shows the aggregate contents, board measure, of many logs at a single glance; obviating the necessity of working out each size logs by calculations, saving much time to the persons doing the work, and avoiding much danger of errors attending hasty calculations.

For Example:—Should you require the contents of 21 logs, 17 inches in diameter and 12 feet in length, (made from Table V. of this book, page 105,) refer to page 116 and you will find directly under 21 logs and opposite 17 inches diameter the amount, 2940 feet; and, in like manner, you will find the contents of any other given amount of logs from 1 to 40 in number, and from 8 to 50 inches in diameter.

Persons scaling logs will save much time and trouble by scaling by the inch and counting by these tables. They can be relied on for correctness, much care and labor having been given, and much time spent in their calculation.

See pages 112 to 119, inclusive, for Table of Logs 12 feet in length.

TABLE VII.

CONTENTS OF SAW LOGS, SCALED BY THE INCH. 14 Feet in Length.

EXPLANATION.

You will find the left-hand column to represent the diameter in inches, and the columns under the word Loss, at the head of the table, to give the amount of feet, board measure, contained in any number of logs, from 1 to 40 in number, and from 8 to 50 inches in diameter.

For Example:—Should you require the contents of 40 logs, 19 inches in diameter, and 14 feet in length, turn to page 127, and you will find, directly under 40 Logs and opposite 19 inches, 8400 feet.

The same rules to be observed as in Table VI., page 110. See pages 120 to 127, inclusive, for Table of Logs, 14 feet in length.

TABLE VIII.

CONTENTS OF SAW LOGS, SCALED BY THE INCH. 16 Feet in Length.

EXPLANATION.

SHOULD you require the contents of 56 logs, 20 inches in diameter and 16 feet in length, turn to page 139, and you will see at a glance that they contain 15, 232 feet, board measure; and, in like manner, you will find the contents of any amount of logs, from 1 to 80 in number, and from 8 to 50 inches in diameter.

Observe the same rules as in Table VI., page 110.

See pages 128 to 143, inclusive, for Table of Logs, 16 feet in length.

TABLE IX.

ROUND TIMBER REDUCED TO CUBIC MEASURE, Bu the ²/₃ Rule.

EXPLANATION.

This is constructed upon what is generally known as the two-third rule. It is used extensively by lumber dealers and inspectors in many sections of the country, and shows the cubic contents of round timber as reckoned by the above mentioned two-third rule.

The average diameter is supposed to be taken, with callipers, at the middle of the log, inside the bark, or by adding the end diameters, and dividing by 2 for the average diameter. Subtract one-third of the diameter; the remaining two-thirds of the diameter will equal the side of the square. It is necessary to exercise considerable judgment in measuring long round timber, as trees do not always have a regular taper; some logs may have a very large swell at the butt, while others may taper very fast toward the top.

A log having an average diameter of 24 inches would equal a square of 16 inches, as shown in the annexed diagram; and, being 60 feet in length, would contain 106 cubic feet; thus, $16 \times 16 =$ $256 \times 60 = 15360 \div 144$ (or by 12) twice) = 106 feet,-fractions in the calculation not counted. Should you

require the contents of the odd lengths, (say 61 feet,) add to the contents of a 60 foot log half the difference between a 60 and 62 foot log of the same diameter; the contents of any log, from 12 to 46 inches in diameter and from 20 to 80 feet in length, may be found at a glance in the same way.

This table gives not only the diameter in inches but also the exact side of the square, as shown at the head of the table.

See pages 145 to 149, inclusive, for table.

ROUND TIMBER REDUCED TO CUBIC MEASURE $By the^{2}/3 Rule.$

TABLE X.

ROUND TIMBER, REDUCED TO CUBIC MEASURE.

Showing Contents of Square Inscribed in Circle.

EXPLANATION.

This table is very useful and convenient, and is much used, in many places, for ascertaining, at first sight, the solid or cubical contents (slab not counted) of any round timber, when squared, by square inscribed within a circle, as shown by the annexed diagram.

17 inches

Square.

Suppose the average diameter of a log to be 24 inches, as shown by diagram; this gives the side of inscribed square, 17 inches.

Now $17 \times 17 = 289$, and this multiplied by the length of the log (say 60 feet,) we have $289 \times 60 = 17,340$, which

divided by 144 (or by twelve twice) gives 120 feet,—fractions in calculation not counted: the contents of a log, 60 feet in length and 24 inches average diameter.

Should you require the contents of the odd lengths (say 61 feet,) add to the contents of a 60 foot log, half the difference between a 60 and 62 foot log of the same diameter.

The contents of any sized log, from 12 to 46 inches diameter and from 20 to 80 feet in length, may be obtained in the same way.

The side of any inscribed square can be found as follows:— Multiply the diameter by 17, and divide by 24; or, multiply the diameter by .7071; this will give the side of the inscribed square with sufficient accuracy for any practical purpose.

This table shows not only the diameter in inches but also the side of the square to the nearest fourth of an inch, as shown at the head of the table.

See pages 151 to 155, inclusive, for table.

TABLE XI.

FULL CONTENTS OF ROUND TIMBER, CUBIC MEASURE.

Including the Slab.

EXPLANATION.

THE following table will be found very useful and convenient to lumber-dealers, and others engaged in buying or selling round timber, of which it is desired to ascertain the entire or cubic contents, including the slab.

In order to find the solid or cubic contents of a log, (say 60 feet in length, and 24 inches averaged diameter,) find in the column of lengths 60, and at the head of the table 24, which is the average diameter in inches; trace the column of lengths till you reach 60; the figures in the column to the right, and under the required diameter, equal the solid contents; thus, opposite 60 and under 24 is 188,—this is the solid contents in cubic feet.

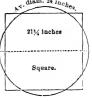

The contents of any odd lengths can be obtained as follows:—Should you desire to obtain the contents of a log, 61 feet in length, add to the contents of a 60 foot log half the difference between a 60 and 62 foot log of the same diameter.

To find the side of a square equal to a given circle: Multiply the diameter by 21.27 and divide by 24; or, multiply the diameter by .8862.

The annexed diagram represents a diameter of 24 inches, equal to a square of 211 inches.

This table shows not only the diameter in inches, but also the side of the square to the nearest fourth of an inch, as exhibited at the head of the table.

See pages 157 to 161, inclusive, for table.

EXPLANATION.—Continued.

To find the amount of 4 days' work or board, at the rate of \$5.00 per week, look for 4 in the column of days, and \$5.00 at the head of the table; trace the two lines until they meet, and you have \$2.86, the amount.

TABLE XIV.

WAGES OR OTHER EXPENSES, PER MONTH

Of Twenty-Six Days.

EXPLANATION.

THE following table has been prepared for, and will be found very useful to a large class of persons who labor by the month, at farming and other employments, and whose limited education renders them dependent on their employers for the correct statement of their accounts.

The left-hand column shows the number of days; the head of the table, the rate per month.

Should you wish to find the amount of 17 days, at the rate of \$8 per month of 26 days, find in the column of days the figure 17, then trace the line to the right till you come under \$8, (the given rate per month,) and you will find \$5.23 to be the amount of 17 days, at the rate of \$8 per month. In like manner you will find the amount of any number of days, at any given rate, from 50 cents to \$40 per month.

The calculations for this table,—as for all the others contained in this work,—having been very carefully made, their

accuracy can be relied upon in every case.

Should you require the amount of wages at a higher rate than is given in this table, say \$60 per month, take twice what is shown for \$30 per month for the same length of time, and you will get the desired amount.

See pages 167 to 171, inclusive, for Table of Wages per Month.

TABLE XV.

SHOWING THE NUMBER OF DAYS FROM ANY ONE DAY IN ONE MONTH,
TO THE SAME DAY IN ANY OTHER MONTH.

	TO	то	то	то	TO	то	то	то	то	то	то	то
FROM	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	l _
January .	365	31	59	90	120	151	181	212	243	273	304	334
February .	334	365	28	59	89	120	150	181	212	242	273	303
March	306	337	365	31	61	92	122	153	184	214	245	275
April	275	306	334	365	30	61	91	122	153	183	214	244
May	245	276	304	335	365	31	61	92	123	153	184	214
June	214	245	273	304	334	365	30	61	92	122	153	184
July	184	215	243	274	304	335	365	31	62	92	123	153
August	153	184	212	243	273	304	334	365	31	61	92	122
September	122	153	181	212	242	273	303	334	365	30	61	91
October .	92	123	151	182	212	243	273	304	335	365	31	61
November	61	92	120	151	181	212	242	273	304	334	365	30
December	31	62	90	121	151	182	212	243	274	304	335	365

EXAMPLE.—Look for May at the left, and September at the top; trace the two lines until they meet, in the angle is 123. In leap-year, add one day, if February be included.

TABLE XVI.

Short and Simple Method of Computing Interest.

EXPLANATION.

THIS rule is so simple and so true, according to all business usages, that every banker, broker, merchant or clerk, in fact, every person should understand it. There being no such thing as a fraction in it, there is scarcely any liability to err or mistake. By no other mathematical process can the desired information be obtained with so few figures.

In computing interest, 30 days is considered a month, and 12

months, or 360 days, a year.

You will observe by the rule that in computing interest, at the rates of 1, 2, 3, 4, 6, 7, 9, 11, 12, 13, 14, 16, 17, 19, 21, 22, 23, and 25 per cent., the right-hand figure is separated. Should there be cents in the principle, separate three right-hand figures, and proceed as directed by the rule; and, at the rates of 5, 8, 10, 15, 18, 20, and 24 per cent., separate two right-hand figures, if there are cents in the principle, and proceed according to the rule.

(SEE NEXT PAGE.)

SHORT AND SIMPLE METHOD OF COMPUTING INTEREST.

- 1 Per Cent.—To find the Interest at 1 per cent., multiply any given number of dollars by the number of days of Interest desired, separate the right-hand figure and divide by 36.
- 2 Per Cent.—Multiply the number of dollars by the number of days, separate the right-hand figure and divide by 18.
- 3 Per Cent.—Multiply the number of dollars by the number of days, separate the right-hand figure and divide by 12.
- 4 Per Cent.—Multiply the number of dollars by the number of days, separate the right-hand figure and divide by 9.
- 5 Per Cent.—Multiply the number of dollars by the number of days and divide by 72.
- 6 Per Cent.—Multiply the number of dollars by the number of days, separate the right-hand figure and divide by 6.
- 7 Per Cent.—Multiply the number of dollars by the number of days, then by 7, separate the right-hand figure and divide by 36.
- 8 Per Cent.—Multiply the number of dollars by the number of days and divide by 45.
- 9 Per Cent.—Multiply the number of dollars by the number of days, separate the right-hand figure and divide by 4.
- 10 Per Cent.—Multiply the number of dollars by the number of days and divide by 36.
- 11 Per Cent.—Multiply the number of dollars by the number of days, then by 11, separate the right-hand figure and divide by 36.
- 12 Per Cent.—Multiply the number of dollars by the number of days, separate the right-hand figure and divide by 3.
- 13 Per Cent.—Multiply the number of dollars by the number of days, then by 13, separate the right-hand figure and divide by 36.

- 14 Per Cent.—Multiply the number of dollars by the number of days, then by 7, separate the right-hand figure and divide by 18.
- 15 Per Cent.—Multiply the number of dollars by the number of days and divide by 24.
- 16 Per Cent.—Multiply the number of dollars by the number of days, then by 8, separate the right-hand figure and divide by 18.
- 17 Per Cent.—Multiply the number of dollars by the number of days, then by 17, separate the right-hand figure and divide by 36.
- 18 Per Cent.—Multiply the number of dollars by the number of days and divide by 20.
- 19 Per Cent.—Multiply the number of dollars by the number of days, then by 19, separate the right-hand figure and divide by 36.
- 20 Per Cent.—Multiply the number of dollars by the number of days and divide by 18.
- 21 Per Cent.—Multiply the number of dollars by the number of days, then by 7, separate the right-hand figure and divide by 12.
- 22 Per Cent.—Multiply the number of dollars by the number of days, then by 22, separate the right-hand figure and divide by 36.
- 23 Per Cent.—Multiply the number of dollars by the number of days, then by 23, separate the right-hand figure and divide by 36.
- 24 Per Cent.—Multiply the number of dollars by the number of days, and divide by 15.
- 25 Per Cent.—Multiply the number of dollars by the number of days, then by 25, separate the right-hand figure and divide by 36.

Note.—Any per cent. of Interest can be found on any number of dollars, by multiplying the number of dollars by the number of days, and then by the per cent. required. Separate the right-hand figure and divide by 36, same as directed above at 7 per cent. This Rule, or above Table, can be relied on, in every instance, as it gives the exact interest. for days, months and years, at one calculation. If there are cents in the principle, separate three right-hand figures.

TABLE XVII. INTEREST TABLE, AT SIX PER CENT.

EXPLANATION.

This table shows the interest, at six per cent., for any number of dollars, from 1 to 1000, and for any period of time, from 1 day to 1 year.

The principle will be found at the head of the table; the number of days, months, or years in the left-hand column.

For Example:—To find the interest on \$21, for 7 months, find figure 7 in the column of months, then trace to the right till you come directly under \$21, (the given principle,) and you have 74 cents,—the interest required.

Should you wish to find the interest for years, months, and days, (say 1 year, 7 months, and 10 days interest on \$84,) find as above directed the interest for one year, which, by the table, is \$5.04; in like manner the interest for 7 months, which is \$2.94; and, for 10 days, which is 14 cents: these sums added together make \$8.12,—the interest required.

See pages 176 to 184, inclusive, for table.

TABLE XVIII.

INTEREST TABLE, AT SEVEN PER CENT.

EXPLANATION.

This table shows the interest, at seven per cent., on any sum, from 1 to 1000 dollars, and for any length of time, from 1 day to one year.

The directions for finding the interest are the same as in the preceding table.

Interest, at seven per cent., may be found by computing interest at six per cent, according to the rule already given on page 172; and, adding thereto one-sixth of the interest, at six per cent.

See pages 183 to 193, inclusive, for table.

To get the average diameter in inches, measure the log at each end and add the diameters together and divide by 2, and you will have the average diameter in inches.

BUSINESS FORMS.

Common Promissory Note.

\$100. Lock Haven, Pa., July 1, 1871.

Sixty days after date I promise to pay A. B. C., or order, the sum of one hundred dollars, value received without defalcation.

D. E. F.

Common Note with Bail.

\$140 $\frac{25}{100}$. Lock Haven, Pa., July 1, 1871.

Six months after date we, or either of us, promise to pay A. B., or order, the sum of one hundred and forty $\frac{25}{100}$ dollars, value received without defalcation. C. D.

E. F. G.

Common Note with Seal.

\$250. Lock Haven, Pa., July 5, 1871.

One year after date I promise to pay to A. B., or order, the sum of two hundred and fifty dollars, value received without defalcation.

Witness my hand and seal, the day above mentioned.

onea.

Witness Present, E. F. G.

C. D. (SEAL)

Common Exemption Note.

\$500. Lock Haven, Pa., July 15, 1871.

Two years after date I promise to pay to the order of A. B. five hundred dollars, with interest from date, without defalcation, value received. Hereby waiving all laws exempting property from levy and sale on execution.

C. D. E.

NOTICE.

If a seal is added to a Promissory Note, it is not barred by the Statute of Limitations, which prevents the recovery of a simple contract debt unless suit be brought or a fresh promise of payment be made within six years. But a Promissory Note with a seal attached, or a bond or single bill, cannot be transferred by a simple endorsement, but only by

assignment.

A Judgment Note differs from a common Promissory Note in having a seal appended, with a power of attorney to confess judgment. The maker, by the power of attorney, authorizes the payee or his assigns, to have judgment entered at any time against said maker, which is a lien upon his lands; and, authorizes the issuing of an execution, whenever said note shall become due and remains unpaid, without resort to a suit to obtain judgment by the ordinary course of law.

A note may be transferred either before or after it is due. When taken after it is due, the assignee takes it subject to all the set-offs and equitable rights between the original parties, and must bring

suit in the name of the assignor.

Common Judgment Note.

LOCK HAVEN, PA., July 10, 1871. \$210 $\frac{50}{100}$.

One year after date I (or we) promise to pay A, B., or order, the sum of two hundred and ten $\frac{50}{100}$ dollars, value received, with interest from date, (or any other time agreed upon), and do hereby authorize and empower any attorney of record in Pennsylvania, or elsewhere, to appear for and confess judgment against and in favor of the plaintiff above named for the above sum, with costs of suit, release of errors, and stay of execution until after the maturity of this Note.

Form of Notice from a Landlord to a Tenant to Remove at expiration of Lease.

Lock Haven, Pa., January 1, 1872.

A. B. C., Sir: Being in possession of a certain house and lot of ground with the appurtenances, belonging to me, situate in the City of Lock Haven, which was demised to you by me, for the term of one year, which said term will expire and terminate on the 1st day of April, 1872, I hereby notify you that it is my desire to have again and repossess the said premises, and I do hereby demand and request you to leave the same. D. E. F.

Yours, &c.,

Form of Notice from Landlord to Tenant, to Remove in Fifteen (or Thirty) Days, for Non-payment of Rent.

LOCK HAVEN, July 10, 1871.

*A. B. C., Sir: You are hereby notified to quit the premises, situate (here describe the same) which I have leased to you, reserving rent, "or pay and satisfy the rent due and in arrears," being dollars cents, which amount was due on the 1st day of July, A. D. 1871, and is hereby demanded,

^{*}Such Notice must be accompanied with a demand for the amount of rent claimed.

(you having neglected or refused to pay the amount so reserved as often as the same has grown due, according to the terms of our contract, and there being no goods on the premises adequate to pay the rent so reserved, except such articles as are exempt from levy and sale by the laws of the Commonwealth) within fifteen* (or thirty days according to the time of year) days from the date hereof, or I shall proceed against you as the law directs.

Yours, &c., C. D. E.

Petition for Laying Out a Road, Public or Private.

To the Honorable, the Judges of the Court of Quarter Sessions of the Peace, in and for Clinton County:

N. B .- The beginning and ending of the road should only be mentioned.

Petition for Review of a Road.

To the Honorable, the Judges of the Court of Quarter Sessions of the Peace, in and for Clinton County:

^{*} If between the 1st of April and the 1st of September, Fifteen Days Notice to be given; and, Thirty Days Notice, if between the 1st of September and the 1st of April. The person who serves this Notice should keep an exact copy of the original, and note on the back of it the date of service.

The petition of the undersigned citizens of the township of insaid county, respectfully showeth: That a road has lately been laid out by order of the Court, from which road, if confirmed by the Court, will be very injurious to your petitioners and burdensome to the inhabitants of the township through which the same runs. Your petitioners, therefore, respectfully pray your Honors to appoint proper persons to review the said road, and report thereon according to law, and they will ever pray.

Report of Viewers in Favor of Laying Out a Road.

To the Honorable the Judges of the Court of Quarter Sessions of the Peace, in and for Clinton

County:

The undersigned persons appointed by the within order of Court, to view and lay out the road therein mentioned,—all being present, and first severally sworn according to law,—do report; that, in pursuance of said order, we have viewed and laid out, and do return for public (or private) use, the following road, to wit: Beginning (here describe the course with reference to the improvements through which it passes) a plot or draft whereof is hereto annexed.

Witness our hands this day of 1871.

A. B. C. D. E. F. Viewers.

Report of Viewers Against Laying Out a Road.

To the Honorable, the Judges of the Court of Quarter Sessions of the Peace, in and for Clinton

County:

The undersigned persons appointed by the within order of Court, to view and lay out the road therein mentioned,—all being present, and first severally sworn according to law,—do report: that, in pursuance of said order, we have viewed the place where the road mentioned is requested, and are of the opinion that there is no occasion to lay out said road.

Witness our hands, this day of 1871.

A. B. C. D. Viewers.

Petition for Vacating a Road.

To the Honorable, the Judges of the Court of Quarter Sessions of the Peace, in and for Clinton

County:

Report of Viewers in Favor of, or Against Vacating a Road.

To the Honorable, the Judges of the Court of Quarter Sessions of the Peace, in and for Clinton

County:

We, the undersigned persons appointed by the within order of Court, to view the road therein mentioned,—all being present, and first severally sworn according to law,—do report: that, in pursuance of said order, we have viewed the said road, (if in favor of vacating said road, report as follows:) and that we are of the opinion that the same has become useuseless, inconvenient, and burdensome, and ought, therefore, to be vacated; (or, if opposed to vacating said road, report:) and that we are of opinion that the same has not become useless, inconvenient, and burdensome, and that there is no cause for vacating the same.

Witness our hands, this _____day of ____A. D. 1871.
